Man’s Worldy Goods

By Leo Huberman

I. Market-price – Surplus value in the form of commodities – is it surplus-labour time in the price based on labour-time

The surplus is first in appearance just a price of a commodity which then is surplus in its very form which means there is surplus in labour-time in it and that is its secret of exploitation which means here is very exploitation happens. It appears a normal price but actually hides surplus-price proved by labour time and aggregate then labour which is working on the production process in the world for worldly goods.

II. Profit and Market therefore in the World as Exploitation in Marxism

In fact there is the story of profitable and company profits and exchange dynamics – that there is exploitation is why this happens and why they create commodities and values and value-forms

III. Special Ending

The world market is then the story of many forms of labour in the world even us in that process called general intellect debating how it works – what is the reason for the world’s exploitation and companies, even law bodies and all of that – it is just the process of in fact exploitation of workers which creates a surplus.
